

voucher). Adult discovered beneath pile of decaying palm fronds in a coastal Florida scrub dominated by rosemary and sand pine. First voucher for the county (Krysko et al. 2011. Atlas of Amphibians and Reptiles in Florida. Final report, Florida Fish and Wildlife Conservation Commission, Tallahassee, Florida. 524 pp.).

E. PIERSON HILL, Florida Fish and Wildlife Conservation Commission, 1105 S.W. Williston Road, Gainesville, Florida 32601, USA; e-mail: pierson.hill@myfwc.com.

PODARCIS SICULUS (Italian Wall Lizard). USA: NEW YORK: WESTCHESTER Co.: Hastings-on-Hudson (40.994542°N, 73.878746°W; WGS 84). 29 August 2015. Ben A. Goldfarb, Max R. Lambert, and Colin M. Donihue. Verified by Richard D. Durtsche. Yale Peabody Museum of Natural History (YPM HERR.019476). New county record (Gibbs et al. 2007. The Amphibians and Reptiles of New York State. Oxford University Press, New York, New York. 504 pp.). This represents a northern expansion of the distribution for this exotic species in New York State; the species is known from New York City (Gossweiler 1975. Copeia 1975:584–585; Burke and Ner 2005. Northeast. Nat. 12:349–360). Multiple individuals were seen on the same date on multiple properties within a 3,500 m² area incorporating three houses, a church, and a small strip mall. Specimen collection was authorized under Yale University IACUC protocol number 2015-10681.

SPHAERODACTYLUS ARGUS (Jamaican Stippled Sphaero). CUBA: HAVANA: MUNICIPALITY OF PLAZA DE LA REVOLUCIÓN: grounds of the “La Edad de Oro” zoo (23.11014°N, 82.39540°W; WGS 84). 12 February 2015. Ruben Marrero, Javier Torres, and Tomás M. Rodríguez-Cabrera. Verified by Orlando H. Garrido. Museum of Natural History “Felipe Poey,” Faculty of Biology, University of Havana (MFP 12.583). First record for Havana Province and a 182 km range extension NW from the nearest published locality at Playa Girón, Ciénaga de Zapata, Matanzas province (Rodríguez and Rivalta 2007. Poeyana 495:8–13); other Cuban records are found in Rodríguez Schettino et al. (2013. Smithson. Herpetol. Inform. Serv. 144:1–96). The adult female was found during the day under a log within the zoo grounds. Specimen collected under the project “Colecciones zoológicas, su conservación y manejo II”, hosted by the Institute of Ecology and Systematics, Cuba.
